■ COMPONENTS

■ AUTOMATIC GUIDED VEHICLE FOR MEDICATION DELIVERY

General Healthy's Automatic Guided Vehicle (AGV) comes in two models: AGV-MK-C and AGV-MK-T. Working in conjunction with our dispensing machines, basket dispensers, and waiting plates, it is designed to transport dispensed medications from the machine to human counters in outpatient pharmacies.

Equipped with SLAM navigation, BARCODE secondary positioning and intelligent command systems, it's a proven and reliable robot for efficient, accurate and safe medication delivery. Additionally, this product boasts an array of indicator lights and voice prompts, ensuring effective interaction with medical staff.
